This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

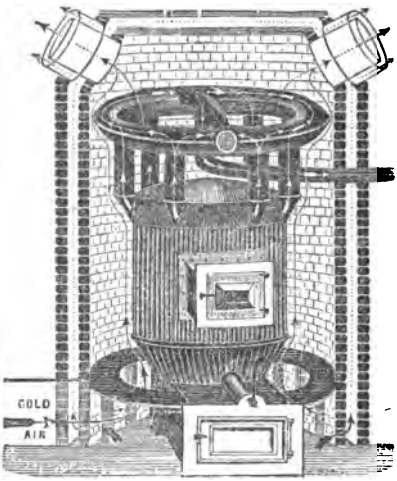
HEAT AND VENTILATION!!

Chilson's Patent World's Fair, Prize Medal

AIR WARMING AND

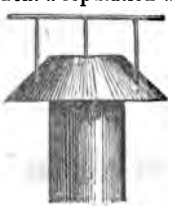
VENTILATING FURNACES.



Having obtained the exclusive right to sell the celebrated CHILSON FURNACE in this vicinity, and having a full assortment of them on hand, there being Four Sizes for setting in brick work, and Five Portable Sizes, we are prepared to put them up at short notice, in the most workmanlike manner in PUBLIC and PRIVATE BUILDINGS of every description; at the same time particular attention will be paid to thorough ventilation.

Some of the important improvements attained by this invention, over all other Furnaces now in market, are purity of air, free from the burnt air so common to red hot furnaces, powerful arrangements for generating heat, economy in fuel, great durability, not liable for repairs, safety against setting buildings on fire, and are easily managed.

The marked favor with which these furnaces have been received in the Eastern towns, having commanded the Highest Premiums at a great number of State Agricultural and Mechanical Fairs, including the Prize Medal at the World's Fair, London, together with the high commendation of scientific gentlemen, in various parts of the country, have given them a reputation which no other heating apparatus ever attained.



Also, all the sizes of Emerson's Patent Ventilators at the Patentee's prices. This is the best Ventilating top ever invented for public buildings, Steamboats, Railroad Cars, &c.; is also a sure preventive for Smoky Chimneys, affected by any change of winds.

Pease's Improved Machinery and Burning Oil,

Will save Fifty per cent. and will not gum.—Patent secured

This improved Oil has been *thoroughly* and *practically* tested by our most experienced and skillful engineers, who have awarded to it the highest praise, and pronounced it *superior* and *cheaper* than any other oil for machinery, and in all cases *reliable*.

It is used on our principal railroads, and in the most extensive factories and machine shops in the country, and extensively used on our Steamers and Propellers. — Engineers, Machinists and all others who have used this Oil, pronounce it the *finest Oil* for lubricating, and cheaper than any other.

Engines and other machinery require less oil, attention and time, and are kept in perfect order by its use. It is adapted to every description of light and heavy machinery, and it will not

GUM OR BECOME STICKY.

Journals and other bearings are kept bright and clean, and possessing a strong heavy body, they are not liable to heat by its use. For Saws and Spindles, which run at a high speed, it is unequalled,—it keeps the bearings in an uniform temperature, preventing heating and reducing the friction.

This Oil possesses qualities vitally essential for lubricating, *and found in no other Oil;* and it is offered to the public on the most *reliable tests*, as the *best* and *most economical* Oil for machinery; it is also a superior burning oil. For sale only by the inventor and manufacturer.

OPINIONS OF THE PRESS.

This magazine is devoted to general literature, containirg a great variety of reading, and consists of forty-eight pages. It is a periodical of an interesting character. We are not aware what circulation it has in Canada; but it is one well worthy the patronage of Canadians. Although but half the price of the ordinary monthly magazines, it contains a much greater proportionate amount of interesting reading matter.—*Toronto Literary Gem.*

The Western Literary Messenger, of Buffalo, edited by J. Clement, Esq., commences its twenty-second volume with the March number, which is now before us, bearing the marks of much improvement in its general appearance.—*N. Y. Recorder.*

The character of the Messenger, and style of its articles are entirely different from the fashionable magazines of the more eastern cities, having a healthy, vigorous, intellectual cast, peculiarly adapted to the family, as a fireside companion for all ages and professions.—*La Port (Ind.) Times.*

It will compare with the best literary monthlies published in Philadelphia and New York, for the interest and instruction of its pages. —*Utica Register.*

We do not hesitate to say, that the Western Literary Messenger is at the head of American magazines.—*Aurora (Ill.) Guardian.*

The Company was organized in 1848, under the general law authorizing the formation of Gas Light Companies. The works were completed and Gas supplied to the city in November of the same year.

The works are situated on the spacious lot on the North side of Genesee street, between Jackson and Fourth streets, and occupy about two-thirds of the block between said streets and the Wilkeson slip.

In the construction of the works, all the modern improvements are embraced, and they are believed to be unsurpassed by any other similar work in the State, in capacity and economy of working.

The large improvements and extensions of 1852 were made with reference to supplying the entire city with Gas, and the future extensions of Pipe to accomplish this object can be made at a comparatively small expense. The quantity now laid is about thirty miles, and the Gasometers are of sufficient capacity to supply this city with a daily consumption of 350,000 cubic feet. The price of Gas was originally fixed at $3,50 per thousand feet, but was reduced in 1851 to $3,00 nett, when promptly paid, which is the price now charged. It is believed to be as low if not lower than Gas is furnished by any private company in the United States.

The power to furnish Gas cheap, consists in the ability to manufacture it in large quantities, and the greater the consumption the lower it can be afforded to consumers.

The increased facilities which may be afforded hereafter by the construction of the Pittsburgh Railroad, to obtain coal at cheap rates, together with increased consumption, will enable the Directors to furnish Gas at the lowest prices yet reached by any other company.

It has been submitted during this time, for analyzation and experiment to the first scientific men in Europe and America; to the Medical College of New York; to distinguished chemists in France, England and Germany; at the WORLD'S FAIR IN LONDON, held in 1851; at the international exhibition in the Crystal Palace, New York, opened in 1853; at the great Belgian Exposition, held in 1847. During this time the inventor and proprietor, EMANUEL LYON, has been honored with

HAS BEEN INTRODUCED BY

BRADY, AT HIS OLD GALLERY,

205 Broadway, cor. of Fulton St. N. Y.

The extent of his establishment enables him to produce for 50 cents and $1, pictures of a quality infinitely superior to the phantoms usually designated cheap pictures. This is a new feature in first-class establishments, and the fame of the artist is too well known to doubt its success. The public can now rely on obtaining as good a picture for that price as can possibly be put up, and a far better portrait than can be obtained elsewhere at the same rates.

Brady's New Gallery, 359 Broadway,

OVER THOMPSON'S SALOON,

Is fitted up with great taste and beauty, and possesses greater facilities for the production of first class pictures than any similar establishment in America. These galleries form an elegant resort for persons of taste, containing, as they do, the largest collection of distinguished portraits in this country.

Prize Medals were awarded to BRADY at the World's Fair in London, 1851, and at the Crystal Palace, New York, in 1853.

CHEMISTS & PERFUMERS

No. 341 BROADWAY, N. Y., (up stairs.)

Having made many interesting experiments concerning the Growth, Decay and Anatomy of the human Hair, and made this their especial study for some years, have now prepared, from experiments of Mr. KNIGHT, a Wash, or Medicine for the Restoration and Preservation of the Hair, called

HAIR REGENERATOR,

Which they warrant to restore the GRAY HAIRS OF ANY PERSON, *old or young*, to their *natural and original color;* also to entirely prevent the Hair from falling off, rendering the Hair firm and healthy; clear the dandruff from the head, heal and *effectually cure* all eruptions upon the skin, &c., and give an entire new growth to the Hair. It also entirely relieves the head-ache, from which so many persons suffer, and which is so destructive to the growth and preservation of a good head of Hair. This new and astonishing Preparation for the Hair, for which so much is claimed, and which promises to produce such wonderful effects, is, nevertheless, as *simple* in its combination and effect, as is every other law of nature. By it the proper nourishment is given to the Hair, which, from various causes, the system itself *fails* to afford. The fluids of the Hair being often diminished or destroyed by the *action* of an over *excited* or *active* brain, as may be seen in *sickness, anxiety* and *trouble*, as well as by the *natural* decline of the human system. The Regenerator does not act upon the Hair as a *dye*, but so nourishes, strengthens and invigorates the Hair, as to cause it to assume its former or *original color*, and by an occasional use of the Regenerator, the Hair *will continue to grow*, and forever *keep* its *natural* color, even to the latest period of life. This has been proved in more than

ONE THOUSAND CASES

Within the last twelve months, and without ever having met with a single failure. No person can use a single bottle of the Regenerator and be left in doubt of its medicinal virtues for the Hair. Try it, and you will then acknowledge you have met with something aside from the THOUSAND *humbugs* of the day; OTHERWISE THE MONEY RETURNED.

Price, One Dollar per Bottle, $5 for Six Bottles,

And sent to any part of the Country.

KNIGHT & CO., have always for sale their celebrated Extracts for the Handkerchief, which they sell for 50 Cents per Bottle; also that beautiful article called Toilet Vinegar, for beautifying and improving the complexion, rendering the skin clear and transparent as that of an infant. Extract of Soap prepared expressly for persons of tender skin, being a soap entirely free from alkali, which pervades all other soaps, and is very injurious to the skin. The above goods may be relied upon as possessing the highest degree of merit, that can be obtained in their manufacture. A trial of which is respectfully solicited.
